Why choose this course?
If you are fascinated by foreign investment, exchange rates and stockmarket fluctuation, consider a career in finance.

Overview
A career in finance is stimulating and rewarding and will provide you with countless opportunities to expand and grow your skills with technological advancements and industry updates.

Develop the skills and know-how to analyse business portfolios and provide recommendations for best financial returns and listen to real-world practitioners as they explain how the value of investments change over time.

Throughout this course you will take part in hands-on projects including real-world quantitative data analysis and practice your skills in our Securities Dealing Room. You will also explore capital planning, funds acquisition, stock broking, and investments management.

There are many growth areas within the finance industry and the skills you develop will prepare you for a variety of career paths in the world of finance.

The Finance major prepares students to plan, manage and analyse the financial, monetary and performance aspects of businesses, including specialist financial businesses such as banks.

Financial management skills are increasingly in demand among businesses of all kinds, but graduates are particularly likely to find work in areas such as banking, funds management, financial analysis, stock broking and financial planning.

The major begins with units on quantitative analysis and economics that extend learning from Faculty core units. Students then learn core concepts and skills in finance, including financial instruments, capital planning, funds acquisition, asset and debt management, financial analysis, and investments management.

The Finance Capstone unit integrates learning across the major by giving students the opportunity to apply their skills to a variety of simulations of real-world situations in the finance industry.

Course combination and career outcomes
QUT’s flexible business degree means you can design your degree to suit your own career aspirations.

Combine your Finance major with studies in accountancy, economics, funds management, financial services or superannuation and wealth management.

Combining the finance major with funds management knowledge will expose you to the general funds management and investment process. You will be equipped for a career with a funds management firm in investment strategy, financial portfolio management, stock analysis and risk management. If you prefer to work somewhere other than a financial firm, large corporations also employ graduates in treasury functions to raise debt funding through corporate borrowing, monitor cash liquidity, and managing foreign exchange risk.

The combination with accountancy provides the opportunity to widen your career opportunities to encompass corporate advisory services including takeovers, mergers and acquisitions, and new company floats.

Including some study in economics can open up options in the private or government sector, in economic analysis and forecasting potential movements in the economy.
Your degree at a glance

Year 1
You will build a base of broad business knowledge through the core units, covering all areas of business from accounting and economics through to marketing and international business. You will gain generic skills in all areas and an understanding of how businesses operate within the commercial and legal environment. You will begin your major with skills in interpreting economic data for business decision making. Business cycles, foreign exchange markets, terms of trade and the significance of the international economy will also be covered.

Year 2
You will build a deeper understanding of the fundamental concepts of finance – the time value of money and the effect of interest rates, diversification and its role in forming an investment portfolio, and the relationship between risk and return. The types of financial markets and instruments traded, such as shares, bonds and futures, will also be introduced. You will also choose a second study area, such as accounting, economics, or further finance studies, which will help to shape your career.

Year 3
Project work and research assignments will hone your practical skills and prepare you for the workplace. You will develop valuation skills relevant to shares and derivatives. You can also act as a corporate treasurer for a semester, using data facilities in the Securities Dealing Room to gain experience in raising funds and managing the risk and cost of borrowing these funds in the face of unfolding economic scenarios.

Professional recognition
By choosing appropriate units in this course, you will meet the Australian financial professional training standard RG146 Tier 1 compliance, as administered by the Australian Securities and Investments Commission. Limits on grades of 3
A new policy concerning grades of 3 came into effect from 1 January 2009 (QUT MOPP C/5.2). With effect from this date grades of 3 are no longer considered a conceded or low pass but are classified as a fail grade. Any grades of 3 awarded prior to 1 January 2009 retain the conceded pass status and will be counted for graduation purposes up to the maximum number of grades of 3 permitted for your course. Grades of 3 incurred in units that commence after 1 January 2009 will not count towards your degree. Further information is available on the Student Services website.

Securities Dealing Room
QUT pioneered the use of real financial data in Queensland universities. Our Securities Dealing Room gives you access to data from Bloomberg, providers of financial data to many of the world’s financial institutions. This comprehensive set of data on companies, commodities and economics will be useful in your final year project work, and allow you to apply the theory you learn to conduct real-world financial analysis.

Industry links
Our finance lecturers have a wealth of real-world experience, including consulting with Queensland Treasury, Brisbane City Council, QR, Queensland Transport and Ergon Energy, and guest lecturing with industry bodies such as the Financial Services Institute of Australasia (FINSIA) and CPA Australia.

Practical teaching
Final year project work and research assignment will hone your practical skills and prepare you for the workplace. You will act as a corporate treasurer for a semester, using data facilities in the Securities Dealing Room to gain experience in raising funds and managing the risk and cost of borrowing these funds in the face of unfolding economic scenarios.

#### AMB202 INTEGRATED MARKETING COMMUNICATION

In past decades many organisations separated the different forms of marketing communication that convey their corporate and marketing messages.
