Bachelor of Business (Finance)

Why choose this course?
Finance is a dynamic field, focusing on the borrowing, lending and investing of money by individuals, financial institutions, business and government organisations. Professional financiers administer the finance function of organisations, analysing and interpreting information to assess their needs and provide advice.

With a degree in finance you will develop the skills to analyse business portfolios and provide recommendations for best financial returns. In this course you have the opportunity to listen to real-world practitioners as they explain how the value of investments changes over time.

You will learn core concepts and skills in finance related to project evaluation, capital structure, security analysis and pricing, portfolio management, international finance and risk management.

Throughout this course you will take part in hands-on projects including capital investment appraisal, firm valuation, portfolio allocations and risk management using up-to-date information from our Securities Dealing Room.

Students who are keen to gain a deeper understanding of finance should consider enrolling in one or both of the finance extensions. Empirical finance extension develops students’ advanced technical and research skills and is a useful foundation for students considering honours. Financial services extension is designed for students considering a career in the banking and financial services sectors.

If you are fascinated by foreign investment, exchange rates, stock market fluctuations or corporate finance, consider a career in finance.

Real-world learning
The major begins with units on quantitative analysis and economics that extend your learning from the core units of our Bachelor of Business degree. You will then be exposed to core concepts and skills in finance, including financial instruments, capital planning, funds acquisition, asset and debt management, financial analysis, and investments management.

Daniella Dinkha
Learn business strategy

‘The best part of my job as Relationship Manager with Westpac Commercial is working with innovative and strategic-minded individuals behind the commercial entities within our customer base. I experience first-hand the challenges our business clients face. At QUT I learnt to think critically and strategically—skills I apply every day as I advise our major clients on funding strategies.’
Bachelor of Business (Finance)

The finance capstone unit integrates learning across the major by giving you the opportunity to apply your skills to a variety of simulations of real-world situations in the finance industry.

Securities Dealing Room
QUT's Securities Dealing Room gives you access to data from Bloomberg, providers of financial data to many of the world’s financial institutions. This comprehensive set of data on companies, commodities and economies will allow you, in your final-year project work, to conduct real-world financial analysis with the theories you have learned.
