Why choose this course?
The Graduate Diploma in Business (Research) is a PhD qualifying course, designed to provide the initial research training required to gain entry into the PhD. The Graduate Diploma in Business (Research) is best viewed as a pathway program and not as a standalone course.

Overview
The Graduate Diploma in Business (Research) provides high-achieving students with no or limited previous research experience the opportunity to develop advanced analytical, theoretical and empirical research skills that provide a sound preparation for advanced research training within a PhD.

The capacity to conduct rigorous independent research will be developed, and the advanced coursework integrates conceptual knowledge and research skills within a discipline. The Graduate Diploma program allows the development of advanced theoretical knowledge integrated with a rigorous introduction to research training in a chosen field. Applicants will have shown high achievement in a relevant undergraduate degree or coursework Masters degree.

As a graduate you will be able to clearly demonstrate an ability to undertake rigorous independent research.

Meeting minimum entry requirements does not guarantee entry into this course. Admission to the Graduate Diploma in Business (Research) program will depend on the availability of supervision, infrastructure and other required resources.

Course design
Students must complete four coursework units (48 credit points) and a dissertation (48 credit points), as per the programs of study described under the individual majors.

Unit prerequisite requirements are deemed to have been satisfied upon admission to this course. Where elective units may be undertaken, students should check prerequisite requirements in the unit synopsis section of the QUT Handbook and obtain approval from the Research Discipline Coordinator prior to enrolment.

PhD Pathway for International Students
Grad Dip Bus(Research) + PhD pathway for international students: If the offer for entry into BS69 is packaged with the PhD, the following conditions will apply:

1. The package is defined as a sequence of programs from BS69 to IF49;
2. Progression from BS69 to IF49 is guaranteed if the BS69 is completed with a GPA of 5.5/7 or greater;
3. A supervisor for the IF49, normally the same as the supervisor for the BS69, is confirmed when assessing entry into the BS69 program;
4. A suitable research topic and thesis title for both BS69 and IF49, the latter of which can be a progression of the topic undertaken in BS69, is confirmed when assessing entry into the BS69 program;
5. The QUT Business School guarantees Research support, places, supervisors and topic areas for IF49 12 months in advance of when the offer for BS69 is made to full time students and 24 months in advance of when the offer for BS69 is made to part-time students.

Course Availability
Please note that the major in Philanthropy and Nonprofit Studies is not available part-time or for mid-year entry.

Important course specific enrolment advice
This course is a PhD qualifying course, and applicants are assessed as to their potential suitability for undertaking a PhD on the completion of BS69. Prior to enrolment in BS69, a supervisor and dissertation topic must be allocated.
Contact with the supervisor prior to applying for entry is essential.

UNIT SYNOPSES

BSN412 QUALITATIVE RESEARCH AND ANALYTICAL TECHNIQUES
This unit provides a detailed overview of qualitative research to support decision-making in business disciplines. The primary purpose of this unit is to develop a detailed understanding of the theoretical contexts in which field studies and qualitative research methods have developed and the techniques that define the approach. Students develop the ability to analyse, conduct, and evaluate qualitative research in discipline areas related to business. The unit provides a basic preparation for the development of a project, thesis or dissertation proposal based on the use of qualitative research.

BSN414 QUANTITATIVE RESEARCH METHODS
Quantitative Research Methods is a postgraduate unit designed to introduce students to a range of quantitative research methods and their application to different research questions and types of quantitative data. Throughout the unit, students will be exposed to a wide range of quantitative research issues including survey and index development, factor analysis, multiple regression, experimental data collection and analysis, ANOVA and MANOVA, structural models, secondary data collection and analysis, and longitudinal data analysis. Each lecture will be conducted in computer laboratories to allow students the opportunity to develop their quantitative research skills using SPSS and AMOS with data provided by lecturers.
