**Minimum English requirements**

Students must meet the English proficiency requirements.

**Additional fees**

**Additional Costs**

There are requirements that you will need to meet as a student in this course. Some of these requirements have associated costs. Information is available from the [Additional course requirements and costs](https://www.qut.edu.au/courses/bachelor-of-paramedic-science-graduate-entry) website.

**Course requirements**

There are requirements that you will need to meet as a student in this course. You will need to identify these requirements and ensure you allow sufficient time to meet them. Some of these requirements have associated costs.

Blue card: You must undergo a criminal history check for working with children and be issued with a suitability card ([blue card](https://www.qut.edu.au/courses/bachelor-of-paramedic-science-graduate-entry)) before commencing clinical placement/practicum in an organisation where they may work with children or young people.

The processing of your application may take several months so you must submit your blue card application to [HiQ](https://www.qut.edu.au/courses/bachelor-of-paramedic-science-graduate-entry) as early as possible to ensure you have your card before you begin any unit that requires contact with children. There is no charge for student blue cards. Students who already have a blue card must register it with QUT.

Information is available from the [Additional course requirements and costs](https://www.qut.edu.au/courses/bachelor-of-paramedic-science-graduate-entry) website.

Note: Graduate entry students undertake a compulsory, comprehensive program during Orientation Week to ensure they are well prepared to complete studies in the final two years of the course.

**International student entry**

This course is not available for entry to international students.

---

**Daniel Pincus**

**Real graduate**

'Living and working in London is awesome, and I love how close Europe is. Being a paramedic is challenging and QUT helped me get here. With real world courses and hands-on training – that made a real difference.'
