Bachelor of Radiation Therapy

Undergraduate international course

Year 2021
QUT code CS49
QTAC code 418192
OP 3
Rank 96
Total credit points 384

Course contact
Freecall: 1800 181 848 (within Australia)
Phone: +61 3 9627 4853 (outside Australia)
Mon - Fri, 8.30am - 5pm

Real-world learning
Our on-campus facilities incorporate technology and equipment to develop your confidence and experience. The Virtual Environment for Radiotherapy Training uses augmented reality 3D technology to immerse you in a virtual environment that features life-sized radiation therapy equipment and virtual patients.

By practising in our facilities you will build confidence and gain experience in fundamental skills using specialist computer programs and the virtual treatment environment.

You will start supervised clinical experience during first semester in your first year, with significant time in the second, third and fourth years. Placements are offered in private and public radiation therapy departments throughout Queensland and interstate areas.

Subject prerequisites
- Mathematical Methods (Units 3 & 4, C)
- Physics (Units 3 & 4, C)

You must have achieved this study at a level comparable to Australian Year 12 or in recognised post-secondary studies.

Minimum English requirements
Students must meet the English proficiency requirements.

Vossco Nguyen
Combine theory with practice

'Radiation therapy interested me due to its combination of technical skills, ever-changing research, and engaging interactions with patients. I chose QUT because it seamlessly incorporated in-class theory with real-world experience. I enjoyed completing placements across the country in many different departments. This hands-on experience was a definite confidence booster and improved my knowledge and skills.'
Additional fees

Additional Costs
There are requirements that you will need to meet as a student in this course. Some of these requirements have associated costs. Information is available from the Additional course requirements and costs website.
