QUT’s Graduate Diploma in Medical Ultrasound is designed to be accessible to rural and regional Queenslanders and interstate students seeking a nationally accredited sonography qualification.

This course is offered as a two year, part-time program.

Over its duration, students are only required to attend three, one-week intensive blocks at QUT’s Gardens Point campus. To complement their learning, students will access new ultrasound simulators and online interactive resources.

The Graduate Diploma in Medical Ultrasound course gives students the scientific basis for understanding, using and evaluating relevant equipment and techniques as a sonographer.

**Minimum English requirements**

Students must meet the English proficiency requirements.

‘The thing about being able to apply knowledge straight away in a clinical environment is that you’re not just studying for an exam, then writing the exam and forgetting all about it. You’re actually applying it and remembering it so it’s information that you’re going to have for your future career.’
