Bachelor of Nursing (Honours) (HL50)

Year offered: 2012
Admissions: Yes
CRICOS code: 016355G
Course duration (full-time): 2 semesters
Course duration (part-time): 4 semesters
Domestic Fees (indicative): 2012: CSP $3,575 (indicative) per Semester
International Fees (indicative): 2012: $11,400 (indicative) per Semester
Domestic Entry: February
International Entry: February
Total credit points: 96
Standard credit points per full-time semester: 48
Standard credit points per part-time semester: 24
Course coordinator: Enquiries to hlthhonours@qut.edu.au or 07 3138 4822
Campus: Kelvin Grove

Overview
The honours programs enable you to develop knowledge, problem-solving and conceptual skills at an advanced level. The programs provide you with education in the techniques and skills for later postgraduate research and enhance professional career progressions.

Dissertation
The dissertation is one 48 credit point unit representing 50 per cent of the program. Work on the dissertation commences during semester 1 (full-time mode) or semester 2 (part-time mode) and is completed over the course of the program. Preparation and presentation of the dissertation is completed under the guidance of a supervisor and is examined externally.

Electives
Students undertake two 12 credit point electives. At least one elective must be a research elective selected from the nominated list of research electives. The second elective may be selected from any honours or postgraduate program offered by the University, subject to prerequisite requirements and with the approval of the student’s mentor/supervisor and the Course Coordinator. Normally the elective unit is chosen from within the student's discipline area or from an area that complements or is relevant to the student’s study program. For further information on available units contact the Honours Coordinator.

International Student Entry
International students may enrol only in full-time studies.

Further Information
For more information about this course, please phone on +61 7 3138 4822 or email hlthhonours@qut.edu.au

### Elective list

- HL51/ HH22, HL50, HL52 and HL55 Electives
- SWB401  Research Methods for Professional Practice
- HLN405  Qualitative Research
- HLN706  Advanced Quantitative Research Methods
- HLN710  Fundamentals of Epidemiology and Research Design
- HLN711  Advanced Qualitative Methods
- PUN105  Health Statistics
- PYB210  Research Design and Data Analysis
- PYB401  Advanced Research Methods
- PYB350  Advanced Statistical Analysis

### Potential Careers:

Community Education Officer, Community Health Officer, Educator, Health Promotion Officer, Health Services Manager, Manager, Nurse, Policy Officer, Public Health Officer, Quantitative Analyst, Research Assistant, Social Scientist, Statistician.

### UNIT SYNOPSES

#### HLN706 ADVANCED QUANTITATIVE RESEARCH METHODS

The content of this unit builds on the basic statistics background assumed of students. A unifying theme is the concept of sources of variation in collected data, how proper design of study and measurement instruments minimises some sources of variation (error), how analytical techniques account for other sources, and finally the issue of introduced error that cannot be accounted for, but must be addressed in discussion of results. Analytical strategies for modelling health data are compared, and practical experience focuses on the analysis and interpretation of various data sets.

**Prerequisites:** PUN105  
**Credit points:** 12  
**Contact hours:** 4 per week  
**Campus:** Kelvin Grove  
**Teaching period:** 2012 SEM-2

#### HLN710 FUNDAMENTALS OF EPIDEMIOLOGY AND RESEARCH DESIGN

This unit introduces you to the fundamentals of epidemiology and qualitative research design. It addresses the collection and interpretation of epidemiological data, introduces measures of disease occurrence and association, and contemporary issues of major importance in health. It provides you with essential skills for logical, scientific assessment of the health and medical literature. There will be a strong emphasis on applying concepts through critical reading of the literature and the development of a comprehensive research proposal as the main practical exercise of the unit.

**Antirequisites:** HLN705, PUN743  
**Credit points:** 12  
**Campus:** Kelvin Grove and External  
**Teaching period:** 2012 SEM-1 and 2012 SEM-2

#### HLN711 ADVANCED QUALITATIVE METHODS

This unit offers you the opportunity to study, explore and understand a range of qualitative methods. The focus is on the development of rigorous qualitative research design and on planning and undertaking data collection, data analysis, interpretation and reporting of qualitative research. The aim is to advance student knowledge and skills in relation to the methods of qualitative research and to foster essential skills in collecting, coding, analysing and reporting qualitative research.

**Credit points:** 12  
**Campus:** Kelvin Grove and External  
**Teaching period:** 2012 SEM-2

#### HLP101 ADVANCED DISCIPLINE READINGS

This unit is a compulsory component of the Faculty of Health Honours programs. It provides the opportunity for students to identify and review the literature relevant to their selected research topic. A one day seminar in advanced information retrieval skills is included in the unit.

**Credit points:** 12  
**Campus:** Kelvin Grove  
**Teaching period:** 2012 SEM-1 and 2012 SEM-2
HLP102 RESEARCH SEMINARS
This unit is a compulsory component of the Faculty of Health Honours programs. Content includes the preparation and completion of a seminar presentation in a professional and scientific manner and attendance at scheduled seminars.

Prerequisites: HLP101 Credit points: 12 Campus: Kelvin Grove Teaching period: 2012 SEM-1 and 2012 SEM-2

HLP103 DISSERTATION
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

Credit points: 12 Campus: Kelvin Grove Teaching period: 2012 SEM-1 and 2012 SEM-2

HLP103 DISSERTATION
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

Credit points: 12 Campus: Kelvin Grove Teaching period: 2012 SEM-1 and 2012 SEM-2

HLP103 DISSERTATION
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

Credit points: 12 Campus: Kelvin Grove Teaching period: 2012 SEM-1 and 2012 SEM-2

HLP103 DISSERTATION
This is a compulsory unit in the Faculty of Health Honours programs. It is broken into a number of components that are completed over successive semesters (as appropriate for full-time or part-time course structure). The dissertation study represents an independent piece of research completed with the guidance of a supervisor.

Credit points: 12 Campus: Kelvin Grove Teaching period: 2012 SEM-1 and 2012 SEM-2

PUN105 HEALTH STATISTICS
Beyond a common core of statistical concepts, each discipline area emphasises its own set of descriptive and inferential statistical methods and even terminology. The content of this unit emphasises both core and health specific statistical methods in the health sciences. Students are provided with substantial practical experience in the application and interpretation of the most common statistical methods to health data, and are also made aware of data management principles in preparation for analysis. There is a strong emphasis on applying concepts through critical reading and discussion of the literature and worked examples from a range of topic areas.

Credit points: 12 Contact hours: 3 per week Campus: Kelvin Grove and External Teaching period: 2012 SEM-1

PYB210 RESEARCH DESIGN AND DATA ANALYSIS
This unit takes an hypothesis testing approach to data analysis. This means that statistical analysis is treated as one step in a larger process which also includes formulating theoretically sound predictions, designing a suitable experiment to test the predictions, selecting the appropriate statistics to test the predictions, calculating and interpreting the required statistics, and reporting the outcomes in the correct way. This unit provides the student with the knowledge and skills required to do these tasks with respect to two types of prediction, differences between means and relationships between sets of scores.

Prerequisites: PYB110 or Admission into PY08 Credit points: 12 Contact hours: 3 per week Campus: Kelvin Grove Teaching period: 2012 SEM-1

PYB350 ADVANCED STATISTICAL ANALYSIS
The unit provides students considering further study in psychology with a thorough grounding in analysis of variance techniques, an introduction to multiple regression, and the data analysis tools used in a broad range of research designs in the social sciences. The unit extends the introduction to analysis of variance and regression provided in PYB210, considering more complex designs involving two or more independent variables. The unit is both theoretical (including the use of conceptual formulae to analyse simple data sets by hand) and practical (analysing data sets using the SPSS statistical package), giving students a firm understanding of the principles underlying each analysis.

Prerequisites: PYB210 Credit points: 12 Contact hours: 3 per week Campus: Kelvin Grove Teaching period: 2012 SEM-2

PYB401 ADVANCED RESEARCH METHODS
This unit provides the student with a firm understanding of a range of multivariate procedures as well as the skills to apply each analysis appropriately. In addition this unit aims to prepare students as critical consumers of psychological research.

Assumed knowledge: Successful completion of a third year research methods unit is assumed knowledge.

Credit points: 12 Contact hours: 3 per week Campus:
Kelvin Grove    **Teaching period:** 2012 SEM-1

**SWB401 RESEARCH METHODS FOR PROFESSIONAL PRACTICE**
This unit provides an introduction to research methods relevant to the practice of social workers and human service professionals. A basic grounding in social research is provided followed by specific research methods in participatory action research and evaluation. The unit provides knowledge and skills in research methods at a very practical level, whilst also demonstrating the relevance and challenges of research within a social work and human services context.

**Prerequisites:** SWB100 or HHB100    **Credit points:** 12

**Teaching period:** 2012 SEM-1
