Doctor of Health Science (HL90)

Year offered: 2011
Admissions: Yes
CRICOS code: 037680K
Course duration (full-time): 3 Years
Course duration (part-time): 6 Years
Domestic Fees (indicative): Aust citizens or PRs will be awarded an RTS/RTA place or a QUT sponsorship for tuition fees. If you exceed the max time, you will be charged - 2011: $7,375 per semester (indicative)
International Fees (indicative): 2011: $10,875 (indicative) per semester
Domestic Entry: February and July
International Entry: February and July
Total credit points: 288 (96 coursework credit points and 192 research thesis credit points)
Standard credit points per full-time semester: 48 (average)
Course coordinator: Enquiries to health.research@qut.edu.au or phone 3138 8290
Campus: Kelvin Grove

Major Study Areas
Major study areas include:
- Health Promotion
- Health Services Management and Policy Sciences
- Nursing
- Occupational and Environmental Health Sciences
- Public Health.

Advanced Standing and Articulation
Advanced standing of up to a maximum of 96 credit points may be granted to candidates who have completed an appropriate masters qualification or its equivalent.

The Doctor of Health Science will fully articulate with the Master of Health Science and students who select their program of study to be consistent with the coursework requirements for the Doctor of Health Science will be eligible for the full credit of 96 credit points.

Course Structure
Students undertake 96 credit points of coursework units and 192 research thesis credit points. The coursework is chosen from the major study areas and must be completed before proceeding to the research component.

To achieve the appropriate advanced levels students must:
- choose one of the major study areas
- complete two units in research methods
- complete one unit in theoretical frameworks
- complete four units from this major study area plus one approved elective unit or complete five units from this major study area.

Students are required to attend a compulsory residential program of two days annually during their candidature.

International Student Entry
International students may enrol in February or July in full-time studies.

Further Information
For more information about this course, please contact the Faculty of Health on phone +617 3138 8290 or email health.research@qut.edu.au

### Year 1, Semester 2
- Theoretical Framework Unit
- Major Study Unit 2

### Year 2, Semester 1
- Research Methods Core Unit 2
- Major Study Unit 3

### Year 2, Semester 2
- Major Study Unit 4
- Major Study Unit 5 or Elective Unit

### Year 3, Semester 1
- IFR424 Doctoral Research

### Year 3, Semester 2
- IFR424 Doctoral Research

### Year 4, Semester 1
- IFR424 Doctoral Research

### Year 4, Semester 2
- IFR424 Doctoral Research

### Year 5, Semester 1
- IFR424 Doctoral Research

### Year 5, Semester 2
- IFR424 Doctoral Research

### Year 6, Semester 1
- IFR424 Doctoral Research

### Year 6, Semester 2
- IFR424 Doctoral Research

### Research Methods Core Units and Major Study Area Units

#### Research Methods Core Units
- Two units must be completed from the following:
  - HLN405 Qualitative Research
  - HLN710 Fundamentals of Epidemiology and Research Design
  - HLN706 Advanced Quantitative Research Methods
  - PUN105 Health Statistics

#### Major Study Area Units
- Students must complete four units from their major study area plus one approved elective unit OR complete five units from this major study area. Please check unit availability for 2008.

### Health Promotion
- HLN701 Independent Study
- PUN034 Advanced Studies and Practice in Health Promotion
- PUN037 Health Program Evaluation
- PUN467 Public Health Risk Assessment

### Health Services Management and Policy Sciences
- HLN701 Independent Study
- PUN608 Health Economics
- PUN632 Leadership in Health Management
- PUN688 International Health Policy and Management
- PUN211 Health Care Finance and Economics

### Public Health
- HLN701 Independent Study
- PUN103 Advanced Epidemiology
- PUP034 Advanced Studies and Practice in Health Promotion
- PUP037 Health Program Evaluation

### Occupational and Environmental Health Sciences
- HLN701 Independent Study
- PUN008 Risk Assessment
- PUN010 Implementing Risk Management
- PUN106 Population Health
- PUN363 Environmental Health Law
- PUN465 Environmental Protection
- PUN466 Communicable diseases
- PUN467 Public Health Risk Assessment
- PUP250 Occupational Hygiene
PUP415 Occupational Health

Nursing

HLN701 Independent Study
NSN424 Evidence Based Practice
NSN507 Contemporary Practice Issues
NSN508 Advanced Readings in Nursing
NSN515 Clinical Leadership and Management

Electives

Electives may be selected from the Major Study Areas List or from units in other discipline fields following consultation with the Course Coordinator.

Potential Careers:
Community Health Officer, Health Policy Officer, Health Promotion Officer, Health Researcher, Health Services Manager, Public Health Officer, Statistician.

UNIT SYNOPSISES

HLN405 QUALITATIVE RESEARCH
This unit addresses a range of qualitative methodologies and methods which represent alternative approaches to the application of the quantitative paradigm in health science research. The predominance of the natural sciences in nursing/health research has come into question in recent times and thus the unit introduces students to the origins of such challenges, to the knowledge bases of the alternative approaches to investigating the microsocial world of health/illness and to the relevant research methods. The unit comprises a series of lectures, seminar presentations and relevant readings.
Credit points: 12 Contact hours: 3 per week Campus: Kelvin Grove and External Teaching period: 2011 SEM-1 and 2011 SEM-2

HLN701 INDEPENDENT STUDY
Independent Study allows students to study a topic which is not otherwise available as a formal unit. Students have the opportunity to pursue their studies relatively independently and to develop and practice skills in problem identification, evaluation and/or critical thinking. The study may be for example a critical literature review, an examination of guidelines or an evaluation. The process and outcomes are negotiated in a contract with a supervisor.
Credit points: 12 Campus: Kelvin Grove and External Teaching period: 2011 SEM-1, 2011 SEM-2 and 2011 SUM

HLN706 ADVANCED QUANTITATIVE RESEARCH METHODS
The content of this unit builds on the basic statistics background assumed of students. A unifying theme is the concept of sources of variation in collected data, how proper design of study and measurement instruments minimises some sources of variation (error), how analytical techniques account for other sources, and finally the issue of introduced error that cannot be accounted for, but must be addressed in discussion of results. Analytical strategies for modelling health data are compared, and practical experience focuses on the analysis and interpretation of various data sets.
Prerequisites: PUN105 Credit points: 12 Contact hours: 4 per week Campus: Kelvin Grove Teaching period: 2011 SEM-2

HLN710 FUNDAMENTALS OF EPIDEMIOLOGY AND RESEARCH DESIGN
This unit introduces you to the fundamentals of epidemiology and quantitative research design. It addresses the collection and interpretation of epidemiological data, introduces measures of disease occurrence and association, and contemporary issues of major importance in health. It provides you with essential skills for logical, scientific assessment of the health and medical literature. There will be a strong emphasis on applying concepts through critical reading of the literature and the development of a comprehensive research proposal as the main practical exercise of the unit.
Antirequisites: HLN705, PUN743 Credit points: 12 Campus: Kelvin Grove and External Teaching period: 2011 SEM-1 and 2011 SEM-2

IFR424 DOCTORAL RESEARCH
Credit points: 24 Teaching period: 2010 SEM-1 and 2010 SEM-2

IFR448 DOCTORAL RESEARCH
Credit points: 48 Teaching period: 2010 SEM-1 and 2010 SEM-2

NSN424 EVIDENCE BASED PRACTICE
On successful completion of this unit students will be able to critically appraise systematic reviews of evidence and design projects for the implementation of evidence into practice. Content includes: Evidence-based terminology, principles and processes; incorporating evidence into practice; comparing and contrasting current practice with the most current evidence; modifying policies and procedures to be consistent with the evidence; use of audit results to identify areas of practice that are consistent with the evidence and those needing revision; formulating strategies for promoting the uptake of evidence-based practice.
Credit points: 12 Campus: Kelvin Grove and External
Teaching period: 2011 SEM-2

NSN507 CONTEMPORARY PRACTICE ISSUES
This unit allows students to explore current issues and develop their understanding through application of relevant theoretical frameworks to nursing practice in selected specialty areas. Students undertaking this unit will examine social, political and economic factors that shape and have shaped nursing practice, analyse factors influencing the organisation of nursing practice, and critically apply a theoretical framework to current issues relevant to nursing practice.
Credit points: 12  Contact hours: Negotiated with Course Coordinator  Campus: Kelvin Grove and External  Teaching period: 2011 SEM-1

NSN508 ADVANCED READINGS IN NURSING
This unit provides the opportunity for students to access and review a body of literature relevant to an area of individual interest in nursing. This will enable students to extend their knowledge and understanding of a topic which is not specifically addressed elsewhere in the course. In addition, students undertaking this unit will have the opportunity to develop advanced skills in information retrieval, critical analysis and writing for publication.
Credit points: 12  Campus: Kelvin Grove and External  Teaching period: 2011 SEM-1 and 2011 SEM-2

NSN515 CLINICAL LEADERSHIP AND MANAGEMENT
This unit aims to extend students' understanding of contemporary issues and trends in the development of leadership in professional practice, strengthen their abilities to provide effective leadership and further develop skills in peer consultation and reflective practice as strategies to support a critical approach to the provision of leadership in the workplace. The unit addresses strategic thinking and planning; organisational and interpersonal communication; decision making; team building; multidisciplinary teams; managing conflict; facilitating change; and creating growth-producing work environments.
Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External  Teaching period: 2011 SEM-2

PUN008 RISK ASSESSMENT
This unit provides the skills necessary to identify and assess risks. Qualitative, semi-quantitative and quantitative methods of risk analysis are investigated in the context of the major perils likely to be considered by an organisation. Various risk analysis techniques including HAZOP, FMEA, hazard indices, fault trees, event trees, reliability analysis, statistical analysis, and probability are discussed.
Prerequisites: PUN001  Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External  Teaching period: 2011 SEM-1

PUN010 IMPLEMENTING RISK MANAGEMENT
A robust system is necessary to ensure the ongoing commitment to the risk management process and to ensure positive outcomes. The risk management process needs to be integrated and strategic in its approach. It requires commitment from senior management and an organisational strategy designed to maximise business value. This unit investigates the role of risk management in an organisation, organisational experiences in implementing risk management programs, and ways of ensuring the success of a risk management program.
Prerequisites: PUN008  Credit points: 12  Campus: External

PUN013 ADVANCED EPIDEMIOLOGY
This unit's aim is the mastery of key principles and concepts of research design. There has been an increasing demand for evidence based health research, and an increasing trend towards research that considers complex biological, environmental and societal inter-relationships. Recent developments in epidemiology have contributed novel research designs and statistical methods to complement these needs. Throughout this unit, students are exposed to these more sophisticated designs and analytical methods. Such knowledge is mandatory for critical evaluation of the current research literature, for design of efficient research studies, and to inform appropriate interpretation of research results at a 'best practice' level.
Prerequisites: PUB326 or HLN710  Credit points: 12  Contact hours: 3  Campus: Kelvin Grove  Teaching period: 2011 SEM-2

PUN015 HEALTH STATISTICS
Beyond a common core of statistical concepts, each discipline area emphasises its own set of descriptive and inferential statistical methods and even terminology. The content of this unit emphasises both core and health specific statistical methods in the health sciences. Students are provided with substantial practical experience in the application and interpretation of the most common statistical methods to health data, and are also made aware of data management principles in preparation for analysis. There is a strong emphasis on applying concepts through critical reading and discussion of the literature and worked examples from a range of topic areas.
Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External  Teaching period: 2011 SEM-1

PUN016 POPULATION HEALTH
This unit addresses some of the significant issues of population health including the complex relationship between health and social, economic, political and lifestyle factors and social disadvantage and health. It examines contemporary concepts of health and illness also draws on
international examples. Potential health issues facing Australia and the world, such as the aging of the population, the impact of genetic technology on health and the health of specific sub-populations are also examined.

Antirequisites: PUP010, PUN251  Credit points: 12
Contact hours: 3  Campus: Kelvin Grove and External
Teaching period: 2011 SEM-1

PUN211 HEALTH CARE FINANCE AND ECONOMICS
The unit develops analytical skills and understanding of micro- and macro- economics as they apply to health and of accounting and financial management decision-making principles and processes. It offers an overview of the financial structure of the Australian Health Care system and the context in which it operates. It also offers an understanding of the basic concepts and tools of economic analysis and introduces concepts that are essential in understanding financial resource management, health and health care.

Credit points: 12  Campus: Kelvin Grove and External
Teaching period: 2011 SEM-1

PUN363 ENVIRONMENTAL HEALTH LAW
The purpose of this unit is to develop students who have a detailed understanding of the legislative and legislative frameworks and principles that form the foundation for environmental health practice. In particular, this unit will detail various legislative tools for the management of public health issues in different settings. The prosecution process and gathering of evidence will be discussed along with a detailed discussion on the environmental health practitioners role under the Public Health Act 2005, Environmental Protection Act 1994 and other related legislation. Major topics covered include: an introduction to law and government, public health law, planning and environmental law, local laws, investigation processes and procedures.

Assumed knowledge: PUN620 is assumed knowledge.
Credit points: 12  Campus: Kelvin Grove  Teaching period: 2011 SEM-1

PUN465 ENVIRONMENTAL PROTECTION
This unit aims to give students a detailed understanding of the causes, controls measures and management strategies for environmental pollution and an understanding of environmental impacts on human health. A variety of topics on environmental management are covered including environmental management principles, environmental policy and legislation, integrated planning, waste management, contaminated land, air pollution, water pollution, and noise pollution.

Prerequisites: PUN620 and PUN363  Credit points: 12
Campus: Kelvin Grove and External  Teaching period: 2011 SEM-2

PUN466 COMMUNICABLE DISEASES
This unit aims to provide a comprehensive overview of communicable diseases and to discuss current surveillance, control and prevention methods/strategies implemented by public health agencies. Topics in this unit include the following: communicable disease principles; physiology and epidemiology; outbreak investigation and management; immunisation; vector control; disease surveillance; and infection control.

Credit points: 12  Campus: Kelvin Grove and External
Teaching period: 2011 SEM-2

PUN467 PUBLIC HEALTH RISK ASSESSMENT
The aim of this unit is to provide future public health professionals with the skills and knowledge necessary to effectively assess and manage risks associated with a variety of public health hazards. Topics covered in this unit include the following: the Australian standard risk management framework; environmental health risk assessment framework (issues identification, hazard identification, dose-response assessment, exposure assessment, risk characterisation); risk management strategies and approaches; fundamentals of environmental toxicology and its application in health risk assessment; health impact assessment; effective risk communication and community consultation approaches for public health risks; and case studies.

Credit points: 12  Campus: Kelvin Grove and External
Teaching period: 2011 SEM-2

PUN608 HEALTH ECONOMICS
This unit covers basic economic concepts and their applications to the health sector, including concepts such as cost utility, opportunity cost, supply and demand, and a range of evaluation techniques. The unit assumes no prior formal training in economics.

Prerequisite(s): PU85, PU60; PUN692; HL38, HL68, HL88, HL90: Nil; PU38: PUN610  Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External
Teaching period: 2008 SEM-2  Incompatible with: PUB433

PUN632 LEADERSHIP IN HEALTH MANAGEMENT
In this unit students develop and apply a researched, conceptual framework to understand management, leadership and change issues, particularly related to health care, consolidated using researching, logical argument, analysis and writing skills. The unit draws on contemporary research and practice

Antirequisites: PUN610  Assumed knowledge: PUN106 or equivalent is assumed knowledge. Other requisites: PUN106 or equivalent is assumed knowledge  Credit points: 12  Campus: Kelvin Grove and External
Teaching period: 2011 SEM-2

PUN688 INTERNATIONAL HEALTH POLICY AND MANAGEMENT
This unit provides students with an understanding of the impact of globalisation on health policy and management, including policy formation and the role of political influences. Students will have an opportunity to explore and understand specific examples of national and international policy in both developed countries and countries in transition, particularly the in Asia-Pacific region.

Credit points: 12  Campus: Kelvin Grove and External

Teaching period: 2011 SEM-2

PUP032 INTERVENTION DESIGN AND THEORIES OF CHANGE
This unit examines theories of change as they impact on health promotion and health education practice and the development and implementation of public health interventions. The unit addresses the strengths and weaknesses of change theory into practice and explores the nature of individual, group and organisational change strategies in public health and health promotion.

Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External

Teaching period: 2011 SEM-1

PUP034 ADVANCED STUDIES AND PRACTICE IN HEALTH PROMOTION
This advanced unit identifies the repertoire of practice skills that health promotion students need to address health problems. It integrates needs identification, systematic planning and evaluation models into practice. Internal students put this knowledge into practice through participation in a group based health promotion project. The process of developing and implementing a health promotion program develops an understanding of issues such as ethics, writing goals and objectives, resources and time management. External students conduct a needs assessment and use the data to write a health promotion program proposal.

Prerequisites: PUP032 and PUP038  Antirequisites: PUN613 and PUP023  Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External

Teaching period: 2011 SEM-2

PUP037 HEALTH PROGRAM EVALUATION
The aim of the unit is to provide students with skills and knowledge of health program evaluation, its place in public health and health sector contexts, the influences of evidence and contexts, both organisational and political in program evaluation and the application of program evaluation techniques. This unit complements health studies and deepens students' understanding of program evaluation in practice.

Assumed knowledge: Knowledge of the principles of health promotion planning is assumed.

Credit points: 12  Campus: Kelvin Grove and External

Teaching period: 2011 SEM-2

PUP250 OCCUPATIONAL HYGIENE
Occupational and environmental monitoring is described as the recognition, evaluation and control of hazards in the workplace. Workplaces contain numerous substances that are potentially hazardous to the health of the workforce, other occupants and the public. Occupational and environmental monitoring spans a number of disciplines including toxicology, engineering and statistics. Students need to develop strong investigative and analytical abilities and professional judgment. Students also develop skills in evaluating the extent of workplace hazards. A preventative approach to dealing with occupational health problems is emphasised based on an understanding of the control hierarchy and the use of exposure standards.

Credit points: 12  Contact hours: 3 per week  Campus: Kelvin Grove and External

Teaching period: 2011 SEM-1

PUP415 OCCUPATIONAL HEALTH
This unit explores chemical hazards in the working environment, epidemiological principles and practice, and identification of special risk groups in the workforce. Topics include the following: the pathological bases of disease in humans; chronic occupational diseases; occupational skin conditions; respiratory diseases; biological hazards in the work environment (bacteria, parasites, viruses, rickettsia and fungi); chemical and physical stresses and their physiological responses; physiological monitoring principles and practice; special risk groups; and epidemiological principles and practice.

Credit points: 12  Contact hours: 3  Campus: Kelvin Grove and External

Teaching period: 2011 SEM-2
