QUT’s Master of Business Process Management will give you the opportunity to develop the expertise in the application of process-centric thinking to effectively support businesses, maximise the impact of available resources and enable innovative business strategies. The program examines business-IT alignment issues through appropriate theory and skill development, and provides career enhancement opportunities into senior management and governance roles.

You will study specialist units in Business Process Management specialisation and may undertake additional study in the areas of corporate systems, IT professional services, enterprise architecture and systems, and information and knowledge management.

Why choose this course?
Business Process Management (BPM) is a set of structured methods and technologies for increasing the operational performance of organisations. Recent studies report that BPM has become a top priority across all industries, and professionals who can combine managerial and IT skills to enhance process performance are in high demand. The required skills cover strategic alignment, governance, process modelling, analysis, innovation, process-aware information systems and change management.

QUT’s outstanding research credibility in BPM has influenced the design of the Master of Business Process Management. It reflects the requirements of the industry’s needs for business process expertise and prepares graduates for an exciting BPM career.

Real-world learning
QUT’s Business Process Management course is widely acknowledged as having strong links to industry. Throughout your studies, you will:

- undertake project-based units that require you to apply theoretical and technical knowledge in the development of BPM related artefacts (e.g., conceptual models and frameworks, business plans)
- use real world and research-inspired problems
- use advanced analytical, conceptual and logical thinking processes to solve novel and complex problems
- cover relevant contemporary BPM and interpersonal capabilities necessary for you to move into senior professional positions.

Entry requirements

Academic entry requirements
A completed recognised bachelor degree (or higher) in business or information technology with a minimum grade point average (GPA) score of 4.0 (on QUT’s 7 point scale); or

A completed recognised bachelor degree (or higher) in any discipline with a minimum grade point average (GPA) score of 4.0 (on QUT’s 7 point scale) and five (5) years industry experience in business, information technology or business process management.

Course structure
The Master of Business Process Management provides graduates with the skills and knowledge to create and align information systems to effectively support business and enable business strategy. The program examines business-IT alignment issues through
appropriate theory and skill development, and provides career enhancement opportunities into senior management and governance roles.

Students will study specialist units in Business Process Management specialisation and may undertake additional study in the areas of corporate systems, IT professional services, enterprise architecture and systems, and information and knowledge management.
