Structures and Units

Design your own degree
Your BCI core units provide you with well-developed communication and digital media skills, an up-to-date insight into the creative economy, and an appreciation of creative collaboration. Creative Industries Transitions units in your final year will prepare you for your creative career as an entrepreneur, consultant, project manager or creative professional, or give you the hunger for higher degree research.

You will choose a creative industries major and from there you may select a second major to develop a significant depth of knowledge and skill in two discipline areas. Alternatively, you might prefer to develop a wide breadth of knowledge across three or more discipline areas by adding to your chosen creative industries major with two minors and two electives.

Your course
Year 1
You will undertake two BCI core units, which provide you with well-developed communication skills and teach you how leading creative industries practitioners exploit their creativity for commercial and artistic gain. Study in your majors and minors commences from your first semester, so you take control of your creative direction from day one.

Year 2
You will continue your studies in your major(s) and/or minor(s) and enhance your career prospects by undertaking further BCI core units in visual communication and project management.

Year 3
You will continue to build your creative skills and knowledge through your majors and/or minors. The Creative Industries Transitions program offers end-of-course units in which you can set yourself up for the creative career you desire. You will undertake at least two units that will allow you to use the skills and knowledge gained during this course and assist your transition out of university. These units comprise:
- an internship program with one of our industry partners
- a creative industries project which can prepare you for work as a freelancer or consultant

- an international study tour, usually to New York, Paris, or another international creative industries city
- an introduction to research unit which will prepare you for higher degree research study (honours, masters, PhD).

AMB202 INTEGRATED MARKETING COMMUNICATION
In past decades many organisations separated the different forms of marketing communication that convey their corporate and marketing messages. They developed separate plans for their advertising, public relations, direct marketing, personal selling and sales promotion with separate goals, objectives, strategies and budgets. Today many companies recognise the concept of integrated marketing communication which integrates these different functions along with other aspects of the marketing mix that communicate with stakeholders and customers. Integrated marketing communication requires a 'total' approach to planning marketing communication programs and coordinating communication strategies in support of overall brand and product/service marketing objectives.
