Why choose this course?
Interactive and visual design plays a pivotal role in the rapidly expanding fields of contemporary communication and new technologies. Careers in this area provide the opportunity to design for electronic and print media, Web and mobile technologies, games and physical computing, as well as new technologies as they continue to emerge.

Practical teaching
Our studio approach will support you to develop a strong conceptual understanding of design, which you will apply through exploration in a range of media and technologies.

You will develop creative and innovative approaches to designing visual and interactive media through your studio work. You will specialise your design interests and build a portfolio of individual practice as well as industry-based interdisciplinary team projects, which you can consolidate through industry placements.

Course structure
With an emphasis on creative and experimental approaches to design for new technologies, this course will take you beyond vocational design courses. You will gain an understanding of established design principles and technical skills. You can complement your design studies with options in film production, visual arts, sound design, game design, information technology or business to diversify your employment options.

Facilities / technology
You will learn in purpose-built multimedia studios in the award winning QUT Creative Industries Precinct.

Career outcomes
This course will prepare you for a range of careers in the creative industries such as advertising and marketing, Web design and electronic publishing, multimedia and interactive entertainment design, games design, and interactive exhibition design.

Graduates work in traditional design companies in areas such as graphic design, marketing, branding and print and television campaigns, Web design, interaction design, usability, knowledge management and information architecture. They also gain employment in new industries. Games companies employ graduates to work on content production, interaction design, visual design and real-time and virtual environments modelling.

You may pursue work in the visual effects and post-production areas of film and television. Multimedia design and interactive installation production is also a growth area in museums and other cultural institutions. In addition, visualisation companies increasingly provide opportunities across industries as diverse as mining, architectural and medical visualisation.

What our students say
In the final stages of her QUT degree, Oksana Zelenko joined a research team to help develop an online visual...
counseling tool for Kids Helpline. The result of the project is an online space that enables young people to use their creativity to express their feelings and describe their interpersonal relationships through visual communication, as an alternative to traditional, verbal forms of counseling. Oksana says lecturers with extensive professional backgrounds provided concrete links between the course material and industry-level design practice. 

"But by far, the best part has been using my skills in a project that contributes to the wellbeing of young people in Australia. I'm continuing to develop my insights and expertise in this area through my PhD at QUT."

UNIT SYNOPSES

AMB200 CONSUMER BEHAVIOUR
This unit provides students with the fundamental theories and models to develop a sound understanding of consumers, their needs, and behaviours. It provides a detailed examination of the consumer decision process and the internal and external influences on this core decision process. The unit also assists students in applying this knowledge to the development, implementation and evaluation of marketing activities within an organisation.

Prerequisites: BSB126 or CTB126 or BSB116 or BSB117

AMB201 MARKETING AND AUDIENCE RESEARCH
This unit provides an introduction to the conduct and evaluation of marketing and audience research across the disciplines of advertising, marketing and public relations. Class members explore how field studies, survey and experimental research are employed to support advertising, marketing and public relations information needs. The unit provides an overview of research process, research design, methods of data collection and analysis, and the development of research proposals to support decision-making. AMB202 INTEGRATED MARKETING COMMUNICATION
In past decades many organisations separated the different forms of marketing communication that convey their corporate and marketing messages.
