Course Overview
The Master of Creative Industries caters for the professional development of Creative Industries practitioners and related professionals. The course develops fundamental and advanced skills, knowledge and practice in the Creative Industries, while at the same time advancing abilities in communication, project management, leadership and project application. Thus, this innovative postgraduate course enables students to fuse creative talents with business and entrepreneurial skills, as the role of manager in the creative industries is to bring together the artist and the consumer through cultural leadership.

Creative Writing
The Master of Creative Industries provide an opportunity for postgraduate students to engage in future visionary entrepreneurship and project design, and the specified Study Area Options give students the opportunity to intensely engage in real projects with practitioners from industry and research centres as supervisors. The Creative Writing Study Area provides students with the expertise and knowledge to develop skills as either freelance or vocational writers. The Study Area delivers a range of skills in major writing forms and genres, including fiction and non-fiction writing so that students can develop a major creative writing project. This project will generally comprise an extended form of prose narrative (i.e. a novella, novel or work of creative non-fiction) and will run for the full period of enrolment. In essence, the MCI is an opportunity to work in a closely mentored way on a long project, as well as to pick up relevant and specific skills in the Study Area of Creative Writing.

Course Structure
To graduate with a Master of Creative Industries (Creative Writing) students are required to successfully complete 144 credit points, as specified in the Study Area structure. Advanced standing of up to 48 credit points however may be available to students who have completed an undergraduate degree in Creative Writing and meet the GPA requirements.

Creative Writing Study Area
This course brings together management skills with technical skills in Creative Writing and explores the creative potential involved in the study of creative writing, as an artistic practitioner working within the Creative Industries. Students will be encouraged to engage with and respond to works as well as cultural and literary theories of creative writing, and will be introduced to practical content to assist continuing personal practice. This course aims to provide an understanding of the fundamental principles of creative writing and its application, as well as a theoretical backdrop to creative practice within the context of the Creative Industries. Such a framework will assist in orientating a career in creative writing or associated practice, and will provide the critical tools for negotiating an informed vocational path.

Previously Studied Pathway
If your undergraduate degree is in a related study area, you can apply for the Previously Studied Pathway. This option allows you to apply for advanced standing for the study area units, so it is possible to complete your Masters of Creative Industries in just one year full-time. You will develop skills in entrepreneurship and management, and half of your study will be dedicated to the major project of your choice.

Career Outcomes
A management career in the creative industries; art writer, creative writer, government officer or publishing professional.

Entry Requirements
An undergraduate degree with an overall minimum grade point average of 5.0 or above (on a 7-point scale). Students whose undergraduate degree is in a related creative industries discipline may apply for the Previously Studied Pathway. Applications without the requisite entry requirements will be considered for special entry. Please contact the Creative Industries Faculty for more information.
