The Graduate Diploma in Environmental Health provides an entry pathway into environmental health professional practice. Students are highly skilled to assess environmental health risks and combat a range of environmental challenges including climate change, pollution, and communicable diseases.

**Entry requirements**

**Academic entry requirements**

A completed recognised bachelor degree (or higher award) with a minimum grade point average (GPA) of 4 (on QUT’s 7 point scale) in any discipline; and

A minimum 48 credit points (equivalent of one semester full-time study) of recognised basic science units that were included at Bachelor level and must include:

- a minimum of 12 credit points (one subject) of foundation chemistry; and
- a further 36 credit points (equivalent to three subjects) in other science areas (e.g. microbiology, physics, anatomy and physiology, life science).

**Minimum English requirements**

Students must meet the English proficiency requirements.

**Course structure**

Students complete eight core units. The course is available full-time and part-time. Internal and external modes are available.

Note: All students are encouraged to attend on campus workshops in six units. The workshops focus on developing practical skills which employers consider desirable.

**Aaron Hieatt**  
**Real graduate**

‘The classmates and professors that I’ve met have all been very helpful and encouraging. It’s nice to know that if I do encounter a problem, or come across a challenge I’ve never seen before, that I have people I can go to for advice who can help me find a solution.’

---

Career outcomes
Practitioners working in the field of environmental health are involved in promoting healthy environments and managing environmental factors that affect human health. These may include: environmental degradation, climate change, contaminated food and water, waste management, disaster management, dangerous goods and chemicals, and drug safety management.

Students may have the opportunity to complete up to 240 hours of placement during this course. This placement is not compulsory but does provide a valuable opportunity for career development and networking. You may also access QUT's career mentoring program which connects you with external industry professionals who are able to offer advice and coaching to support your career goals.

Leading industry professionals are contributors to the development and ongoing sustainment of our programs. They provide insight into emerging trends and are regular guest lecturers and presenters in many of the environmental health subject areas.

Many graduates find employment as an environmental health officer (EHO). Their role may include: auditing of food safety and standards, environmental (e.g. air, water, noise) monitoring, investigations of environmental health complaints/issues, investigation of infectious disease outbreaks (e.g. food borne illness, Legionnaires disease, lead poisoning, Q fever, meningococcal disease), infection control auditing, mosquito and vector control, implementing tobacco control initiatives, working with Indigenous communities, policy development, health promotion, and prosecutions for breaches of health and environmental legislation.

Graduates of this program gain employment with local councils or state government departments, with positions also available with Commonwealth Government agencies, including the Australian Defence Force. There are an increasing number of private sector positions being created particularly in the areas of environmental and food safety auditing/management. There are also employment opportunities in other countries, such as the UK, USA and Canada, as well as in developing countries. Graduates are well prepared to compete for, and effectively perform, in a wide range of roles and responsibilities.

Professional recognition
This course was the first postgraduate course to be accredited with Environmental Health Australia and graduates are eligible to practice as environmental health officers.

Scholarships
You can apply for scholarships to help you with study and living costs.

- Equity scholarships scheme

Course articulation
The Graduate Diploma in Environmental Health articulates into the Master of Health, Safety and Environment.
