Master of Health Management

This program is ideal for clinicians interested in pursuing a management or executive career in health policy or health care.

The Master of Health Management develops students’ knowledge across the broad scope of health. This course prepares graduates to provide leadership in a range of health services and programs. Students may choose to complete a specialisation in emergency and disaster management, health law, health policy and planning, quality and patient safety, or a cross-specialisation. Note, the specialisation is not part of the award title and does not appear on the graduation parchment.

**Entry requirements**

**Academic entry requirements**

Master of Health Management - 2 year program

A completed recognised bachelor degree (or higher) in any discipline.

Master of Health Management - 1.5 year program

A completed recognised bachelor degree in health, business or law.

Please note you do not need to apply for the 1.5 year program as you will be automatically assessed for eligibility as part of QUT’s application for admission process.

**Course structure**

Students who have been awarded advanced standing and are undertaking the 1.5 year program are required to complete a total of 144 credit points for the award of the degree.

- You must complete six core units and one research methods unit.
- You must also complete a 24 credit point research project, 24 credit point internship or 48 credit point dissertation.
- If you wish to undertake a specialisation, then you will need to complete two core units from the specialisation and undertake your project or internship in that field.
- You may choose electives from across the program to complete your 144 credit points.

**Take your career to new heights**

‘After finishing medicine I decided to move into a career that would have an impact at the population level. QUT’s Master of Health Management demanded that we think about how theoretical concepts could be applied in the workplace. The exchange of ideas between researchers, practitioners and students working in different fields across the health sector was a transformative experience for me - one that I’m certain will bring positive impacts to my career.’

Course requirements
There are requirements that you will need to meet as a student in this course. You will need to identify these requirements and ensure you allow sufficient time to meet them. Some of these requirements have associated costs.

Blue card: you will need a valid blue card to complete practical placements in this course.

Information is available from the Additional course requirements and costs website.

Careers and outcomes
Health service managers are responsible for the business of health care. Their skills are used to develop strategies to maximise the efficient and effective delivery of health services in a diverse range of health settings. Health is a global industry and graduates have a range of employment options in both the public and private sector and an opportunity to make an important contribution to the future of health services nationally and internationally. Health services practitioners work as health service or health administration managers or officers, project officers, health insurance workers, and human resource managers.

Our graduates have been employed in government health departments, public and private hospitals, primary healthcare services, health insurance agencies, community health services and universities.

This information has been prepared for Australian and New Zealand citizens and those with Australian permanent resident status. Some courses are not open to international students, and entry requirements and fee information may be different.
